

Thank you for your purchase.

We use red oak and hand-woven cane seats and backs to make your rocker comfortable and durable.

Cane is a natural fiber that will last for years with proper care. To help keep your cane from becoming brittle, we suggest a light misting monthly and more often especially if your rocker is near a heating vent.

Should you find a loose or broken piece, use wood glue to repair. Pressure will need to be applied with a heavy object or clamp to help the cane lay flat.

There are many weavers all over our great country who are great at repairing and reweaving. To find a weaver in your area visit www.wickerwoman.com, www.seatweaversguild.com, a local furniture repair shop, or antique shop.

This should help keep you rocking comfortably for many years! We hope you have plenty of opportunities to “Sit a Spell” relax, reflect and enjoy!
